SEO / GEO / AEO Audit Report

FULL AUDIT

SEO	GEO	AEO
4/10	3/10	2/10
Needs Work	*Needs Work*	*Needs Work*

Audit date: 2026-10-26

Claude Skill and Plugin by Alex Labat

Executive Summary

Olympiawerk has a genuinely distinctive story – a master carpenter who has worked in Munich's listed Olympic Village since 1995, now running a neighbourhood service shop with parcel, parking and handyman services – and a technically clean Wix setup. But search engines and AI assistants see very little of it: the site has only three indexable pages of 100–260 words, all detailed service descriptions sit in pop-ups, and there is no LocalBusiness schema. The most urgent issue is inconsistent business data: the website, the Impressum and the major directories list three different addresses and two different opening hours, which undermines trust for Google Maps, voice assistants and AI answers alike. The biggest opportunity is cheap and fast: unify the business data, turn the four service pop-ups into proper pages, and add LocalBusiness + FAQ markup – that alone should lift visibility for hyper-local searches like "Schreiner Olympiadorf" or "Paketshop Olympiadorf".

Dimension	Score	Status	Key Takeaway
SEO	**4/10**	Needs Work	Clean technical base, but thin content and services hidden in pop-ups.
GEO	**3/10**	Needs Work	Strong founder story, but conflicting NAP data, no entity markup, few reviews.
AEO	**2/10**	Needs Work	No FAQs, question headings or structured answers.
Combined	9/30		

Not assessed (requires other tools): Core Web Vitals and page speed (pagespeed.web.dev), backlink profile (Ahrefs/Semrush), actual rankings and click data (Google Search Console), and the live Google Business Profile contents (rating, categories, photos), which Google does not expose to automated fetches.

Pages Audited

URL	Page Type	Notes
https://www.olympiawerk.de/	Homepage	3x H1, ~260 words, services hidden in pop-ups, only WebSite schema
/pakete-1	Service: parcel shop	Meta description copied from parking page; ~105 words
/parkplätze	Service: parking	Umlaut URL, 2 images missing alt, ~110 words
/impressum	Legal notice	Lists Flensburger Str. 47, 81929 München (different address)
Pop-ups: Reparatur & Instandhaltung, Sicherheit & Schutz, Anpassung & Montage, Vermittlung & Service	Service details (lightboxes)	Richest content on the site, but not indexable as pages
/robots.txt, /sitemap.xml	Crawl files	Wix defaults; sitemap lists only 3 URLs
/services.html, /kontakt.html (legacy)	Old URLs still found in search	Return HTTP 400, no redirect
11880.com, golocal.de, cylex.de, orte.muenchen.de, Google entity	Third-party listings	Address and hours inconsistent with website

SEO Analysis

Score: 4/10 – Needs Work

Technical On-Page

Signal	Finding	Status
Title tags	Homepage title is "Start | Olympiawerk" (19 chars): no service or location keyword. Inner pages "Pakete | Olympiawerk", "Parkplätze | Olympiawerk" also lack "München"/"Olympiadorf".	Needs Attention
Meta descriptions	Homepage description is good and local ("…Service- und Handwerkerladen im Olympiadorf München", 99 chars). /pakete-1 reuses the parking text "Wir vermitteln Parkplätze im Olympischen Dorf München." – wrong for a parcel page.	Needs Attention
Heading hierarchy	Homepage has three H1s ("Für jedes Problem eine sichere Lösung", "Ihr Service- und Handwerkerladen…", "Wir freuen uns über Ihren Besuch."). A full paragraph of body text is marked up as an H2. Inner pages have one clean H1 each.	Needs Attention
URL structure	"/pakete-1" carries a Wix duplicate suffix; "/parkplätze" uses an umlaut (encoded as parkpl%C3%A4tze). Service pages don't exist as URLs at all.	Needs Attention
Canonical / indexability	Self-referencing canonicals on all pages, no noindex, apex and http redirect (301) to https://www.	Good
Mobile viewport	Viewport meta present; Wix serves server-rendered HTML.	Good
Image alt text	Homepage: 1 of 5 images without alt; one alt is stock credit "Image by Adam Winger". Parking page: 2 of 5 without alt. Team photos have file-name-style alts ("Olympiawerk_ChristianTreffer.jpg").	Needs Attention
Internal linking	Main menu items Über uns, Leistungen, Lage & Öffnungszeiten, Kontakt all point to the homepage (anchors). Service "mehr dazu >" buttons open pop-ups instead of pages.	Needs Attention
Legacy URLs	Search engines still surface old URLs such as /services.html; they return HTTP 400 instead of a 301 to the new pages.	Missing
Open Graph / Twitter	og:title, og:description, og:image (1920×1280) and summary_large_image card present.	Good
Favicon	Generic Wix favicon (static.parastorage.com/client/pfavico.ico) – no brand icon in search results/tabs.	Needs Attention

Content Quality

Signal	Finding	Status
Word count	Homepage ~260 words, /pakete-1 ~105, /parkplätze ~110. Far below the 500+ words needed to rank for competitive local service terms.	Missing
Service coverage	Over 20 services (Fenster, Türen, Böden, Markisen, Rollläden, Wasserschäden, Einbruchschutz, Schlüsseldienst, Küchenmontage, Möbel nach Maß, barrierefreier Umbau, Denkmalschutz, Copyshop, Paket- & Briefempfang…) exist only inside pop-ups. No page targets e.g. "Schreiner Olympiadorf" or "Schlüsseldienst München Milbertshofen".	Missing
Copy quality	The "Schlüsseldienst" text is a copy-paste of the "Einbruchschutz" text. Typos: "ein einmalige Servicegebühr", "spontan ausweicht Parkplätze".	Needs Attention
Freshness	No dates, news or updates anywhere; sitemap lastmod 2026-03-26.	Needs Attention
Readability	Short, scannable paragraphs and clear service groupings.	Good

Structured Data

Signal	Finding	Status
Schema present	Only a minimal WebSite object {name, url} generated by Wix.	Needs Attention
LocalBusiness	No LocalBusiness / HomeAndConstructionBusiness / Locksmith markup: no address, geo, telephone, openingHours or areaServed for Google to read.	Missing

GEO Analysis

Score: 3/10 – Needs Work

E-E-A-T Assessment

Signal	Finding	Status
Named people	Strong: Christian Treffer (in the Olympiadorf since 1995, recommended by the Denkmalschutz office, "Münchens erster Schreinermeister mit Elektroauto") and Martine Treffer, with photos.	Good
About page	"Über uns" is a homepage section, not a dedicated page; the Meister title, founding (2016) and Denkmalschutz experience aren't marked up or expanded.	Needs Attention
Contact information	Phone and e-mail on every page; hours shown (Mo–Fr 08:00–14:00).	Good
NAP consistency	Three different addresses: website Straßbergerstr. 3, 80809; Impressum Flensburger Str. 47, 81929; 11880/golocal/social posts Helene-Mayer-Ring 15, 80809. Hours differ too (website 08–14, 11880 08–18). A second phone/fax (089 425713, 032 128733337) appears in directories.	Missing
Trust signals	No testimonials, reviews, certifications (Meisterbrief, Handwerkskammer), or partner logos (GLS, UPS, EasyPark, Parkster) on the site. Directories show only 1–2 reviews.	Missing
Organization entity	No Organization/LocalBusiness schema, no logo markup, no sameAs links to Google, Facebook (facebook.com/olympiawerk) or directories.	Missing

Content for AI Synthesis

Signal	Finding	Status
Factual density	Some citable facts (since 1995, opened 2016, €2.00 parcel fee, GLS/UPS, EasyPark/Parkster/Parkimeter apps), but most service facts are in pop-ups that AI crawlers may not see as separate documents.	Needs Attention
Clear value proposition	"Ihr Service- und Handwerkerladen im Olympiadorf München" is stated plainly near the top.	Good
Entity clarity	The brand name is consistent ("Olympiawerk"), but its relationship to "M. Treffer Schreiner" (Impressum/legal entity) is never explained, which splits the entity across sources.	Needs Attention

Signal	Finding	Status
Originality	Unique niche: an all-round "Kiez" service shop for a listed 1972 Olympic Village, with heritage-protection know-how. This is exactly the kind of distinctive story AI engines like to cite – currently under-told.	Needs Attention
Comprehensiveness	No prices (except parcels), no service area, no process ("how to book"), no answers to obvious questions.	Missing

Technical GEO

Signal	Finding	Status
HTTPS	Valid HTTPS with 301 redirects from http/apex.	Good
Crawlability	robots.txt allows all major and AI crawlers (only PetalBot blocked). Pages are server-rendered by Wix. Wix rate-limited repeated requests (HTTP 429 challenge) during this crawl, which can also affect some AI crawlers.	Good
Structured data depth	No Person, Service, Offer or FAQ types.	Missing
sameAs / entity links	No links from the site to the Google Business Profile or Facebook page.	Missing

AEO Analysis

Score: 2/10 – Needs Work

Featured Snippet Eligibility

Signal	Finding	Status
Direct answers	No question-phrased headings with 40–60-word answers.	Missing
Definition pattern	Parking page opens with a clear "Das Olympiawerk vermittelt Parkplätze…" sentence – a good model to repeat.	Good
Lists	Service pop-ups are formatted as "Label: description" lines, not real HTML lists, and not on indexable pages.	Needs Attention
Tables	No tables (e.g. parcel fees, parking rates by hour/day/month).	Missing

Structured Answer Formats

Signal	Finding	Status
FAQ content / schema	No FAQ section or FAQPage schema.	Missing
HowTo	Parcel pick-up steps (check status, bring ID, Vollmacht) are a natural HowTo but are written as prose.	Needs Attention
Question headings	None ("Wo kann ich im Olympiadorf ein Paket abgeben?", "Wie miete ich einen Stellplatz?" would fit).	Missing
Speakable	Not used.	Missing

Voice Search Readiness

Signal	Finding	Status
Conversational tone	Friendly first-person intros from Christian and Martine – good voice-search style.	Good
Long-tail coverage	Typical voice queries ("Paketshop Olympiadorf geöffnet?", "Schlüsseldienst in der Nähe Olympiapark") aren't answered anywhere.	Missing
Local signals	Address and hours on the homepage, but no LocalBusiness schema and the address conflicts with directories; voice assistants rely heavily on the Google Business Profile, so its accuracy is critical.	Needs Attention

Priority Recommendations

Priority	Issue	Dimension	Effort	Impact
Critical	Unify NAP: decide the one public address (Straßbergerstr. 3 vs Helene-Mayer-Ring 15), phone and hours; update Google Business Profile, 11880, golocal, cylex, Facebook; explain the Flensburger Str. legal address in the Impressum	GEO / Local	Low	High
Critical	Turn the 4 service pop-ups into real pages (e.g. /schreiner-reparatur, /sicherheit-schluesseldienst, /montage-moebelbau, /service-vermittlung) with 400–800 words each and link them from the menu	SEO / GEO	Medium	High
High	Add LocalBusiness JSON-LD (HomeAndConstructionBusiness) with address, geo, telephone, openingHoursSpecification, areaServed "Olympiadorf / Milbertshofen-Am Hart", founder, sameAs	SEO / GEO / AEO	Low	High
High	Rewrite titles: "Olympiawerk – Schreiner & Handwerkerservice im Olympiadorf München", "Paketshop GLS & UPS im Olympiadorf München | Olympiawerk", "Parkplatz mieten im Olympiadorf München | Olympiawerk"	SEO	Low	High
High	Build a review engine: ask satisfied customers for Google reviews (QR code at the counter, link in invoices); show selected reviews on the site	GEO / Local	Low	High
High	Add an FAQ section per page with FAQPage schema (opening hours, parcel fees, ID/Vollmacht, parking booking, Schlüsseldienst availability, Denkmalschutz)	AEO	Low	High
Medium	Create a dedicated "Über uns" page: Christian Treffer's Meister qualification, since 1995 in the Olympiadorf, Denkmalschutz work, e-mobility, Martine Treffer; Person schema	GEO	Medium	Medium
Medium	301-redirect legacy URLs (/services.html, /kontakt.html …) to the new pages in Wix → SEO → URL Redirect Manager	SEO	Low	Medium
Medium	Add pricing tables (parcel fee, parking per hour/day/week/month) and logos of GLS, UPS, EasyPark, Parkster, Parkimeter	AEO / GEO	Low	Medium
Medium	Consider pages for other services found in directories but missing from the site (Copyshop/Internetcafé, Textilreinigung, Schuhreparatur, DPD) – or remove them from listings if discontinued	SEO / GEO	Medium	Medium

Priority	Issue	Dimension	Effort	Impact
Quick Win	Homepage: keep one H1, turn the others into H2; turn the paragraph H2 into normal text	SEO	Low	Medium
Quick Win	Fix /pakete-1 meta description; rename URLs to /pakete and /parkplaetze (with 301s)	SEO	Low	Medium
Quick Win	Write real alt texts ("Christian Treffer, Schreinermeister im Olympiawerk"), fix the duplicate Schlüsseldienst text and typos, upload a brand favicon	SEO	Low	Low
Quick Win	Link to the Google Business Profile and Facebook from the footer	GEO	Low	Low

Example: LocalBusiness JSON-LD

Add via Wix → Settings → SEO → Structured Data Markup (homepage). Replace the address with the one you decide is correct.

What's Working Well

Unique, credible founder story	Named owners with photos; "seit 1995 im Olympiadorf", recommendation by the Denkmalschutz office, Munich's first master carpenter with an EV.
Clear local positioning	Homepage description and H1 say "Service- und Handwerkerladen im Olympiadorf München".
Technical basics	HTTPS, 301 redirects, self-referencing canonicals, XML sitemap, open robots.txt, server-rendered HTML, complete Open Graph tags.
Easy contact	Click-to-call (tel:+498935095900) and mailto buttons in the header of every page.
Existing directory footprint	Listed on 11880, golocal, cylex and with a Google knowledge-graph entity – a base to clean up rather than build from zero.

Glossary

SEO (Search Engine Optimization): making pages rank in classic search results on Google and Bing, including Google Maps for local businesses.

GEO (Generative Engine Optimization): making a business understandable and citable for AI search tools such as ChatGPT Search, Perplexity, Gemini and Google AI Overviews – driven by clear entity data, consistent facts and trust signals.

AEO (Answer Engine Optimization): structuring content so search engines and voice assistants can lift a direct answer – featured snippets, "People also ask", Siri/Alexa/Google Assistant.

NAP: Name, Address, Phone – must be identical everywhere a business is listed.
